We're on the same page. I am dealing with a need to respond to some p-ing and m-ing..... in Silverton (ARSG) about - apparently not telling them what we're doing. So, I wanted to be sure on the goal for the pour.

Pour concrete by Sept 1 and cure for 28 days. DeNeef for one day and close the valve.

By the way, we may not have been on the same page on something - the completion date for the project states September 30. So, I may have not made this as clear as I thought. The goal was to pore concrete by Sept 1, so that we can close the valve by early October. How does this mesh with what we are considering complete ?
